Trusted by data enthusiasts

Powerful Features

Everything you need for intelligent data exploration

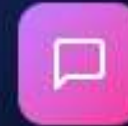

Conversational Memory

Context-aware responses with full conversation history. Ask follow-up questions naturally.

Dynamic Visualization

Generate real-time graphs and charts from natural language queries instantly.

Natural Language Queries

No SQL required. Just ask questions in plain English and get intelligent answers.

Smart Data Interpretation

Advanced statistical analysis with aggregations, filtering, and grouping operations.

Lightning Fast

Powered by FastAPI and optimized algorithms for instant query responses.

Deep Insights

Uncover patterns and trends in the Titanic dataset with AI-driven analytics.

Cutting-Edge Technology

Built with the latest AI and web technologies for optimal performance and intelligence.

- **Mistral-7B-Instruct**
Advanced language model
- **LangChain**
LLM orchestration framework
- **FastAPI**
High-performance backend
- **Streamlit**
Interactive frontend
- **Pandas & NumPy**
Data processing powerhouse

Ready to Explore Your Data?

Start chatting with the Titanic dataset now. No setup required, just click and explore.
